EDUCATION

The University of Texas at Dallas - B.S., Computer Science

Richardson, TX · Aug 2024 - May 2028

EXPERIENCE

Colaberry - Product Management Intern

Plano, TX

Jun 2026 - Present

- **Agile delivery:** selected for a product internship on a Scrum team building data-analytics tooling; contributing to sprint planning and feature discovery.

Association for Computing Machinery (ACM UTD) - Marketing Co-Director

Jan 2026 - Present

Largest CS org at UT Dallas (1,000+ members). Promoted from Design & Marketing Officer.

Richardson, TX

- **Growth:** grew a 1,000+ member org's Instagram to a record 314K views and 15.7K accounts in one month by A/B testing cadence and segmenting creative by audience.
- **Ops tooling:** built an internal request-intake tool (Typeform, Sheets, Apps Script) that routes 90+ design and marketing requests per semester into one prioritized queue, replacing ad-hoc DMs.
- **Team leadership:** lead 19 marketing and design officers against a campaign roadmap for hackathons, technical programs, and divisional launches.

Kappa Theta Pi (Technology Fraternity) - VP of Marketing

Jan 2026 - May 2026

Promoted from Director of Social Media after one year.

Richardson, TX

- **Funnel ownership:** ran a 60-applicant recruitment funnel to a 19-person pledge class (32% conversion) with a multi-week campaign tied to chapter KPIs.
- **Cross-functional leadership:** led a 3-person social and design team from concept to deployment, setting the semester marketing roadmap with the executive board.

Beats by Dre - Data Analytics Extern ([Extern.com](#))

Dec 2024 - Mar 2025

Remote

- **User research:** analyzed ~150 survey responses and Amazon reviews on the Beats Pill for purchase drivers, price sensitivity, and sentiment, then packaged the findings into product recommendations.
- **AI-assisted analysis:** used LLM tooling to accelerate survey and review synthesis and draft the write-up, cutting analysis time roughly in half.

PROJECTS

Risk Radar - Front-End Lead

Apr 2026

Winner, State Farm Challenge @ WEHack 2026 · React, Flask, Python, MongoDB, OpenAI · 4-person team

- **0-to-1 product:** won the State Farm Challenge at WEHack 2026 with a home-risk platform that turns inspection reports, claims history, and address data into an explainable risk score with prioritized recommendations.
- **Product scoping:** scoped the interactive floor-plan visualization as the core differentiator, mapping 3 risk categories (fire, water, weather) to room-level context.
- **Technical build:** built the Flask scoring pipeline fusing 2 external data sources (FEMA, NOAA) with quiz inputs into one household risk profile.

Muse - Product Manager & Builder

Jul 2026

Next.js, vision model, embeddings, OpenAI

- **AI product:** built an AI web app that reads a whole Pinterest board's aesthetic and turns it into a shoppable page of real products, instead of matching one pin at a time.
- **Metrics ownership:** owned it end to end, wrote the spec, cut scope to a focused MVP, defined success metrics (12+ matches per board, under 30 seconds to results), and shipped it on a vision model and embeddings.

Analytico - Product Manager & Builder, Founding Team

Jan 2025 - Present

React, Tailwind, Supabase, Figma

- **Product ownership:** took a stalled front-end-only project and pivoted it into a Facebook analytics app for student-org marketers, a problem I hit running marketing for two orgs. Set the roadmap and run ongoing user research.
- **Full-stack build:** own it end to end, building the Supabase backend and data model plus the responsive React and Tailwind front end across dashboards, reports, and recommendation flows.

SKILLS

AI / Product: LLM app development, evals & prompt design, model selection and cost/latency tradeoffs, embeddings & semantic search, discovery, roadmapping, A/B testing, product analytics, user research

Build & growth: Next.js, React, TypeScript, Tailwind, Flask, Node, Python, SQL, Supabase, Vertex AI (Gemini), Figma, Git · content strategy, social growth
